mokarma@uw.edu | Seattle, WA | (206) 391-0684 | [linkedin.com/in/mohan-marada](https://www.linkedin.com/in/mohan-marada)

EDUCATION

FOSTER SCHOOL OF BUSINESS, UNIVERSITY OF WASHINGTON, Seattle, WA June 2027

Candidate for Master of Business Administration (MBA), Management Science (STEM)

- Dean's Merit Scholar
- Foster Tech Club, Strategy Club

UNIVERSITY COLLEGE OF ENGINEERING, OSMANIA UNIVERSITY, Hyderabad, India. April 2018

Bachelor of Engineering, Computer Science and Engineering

EXPERIENCE

ANSEMBLE AI, USA 2024 – 2025

An all-in-one operating system for indie artists to create, analyze, and market their music.

Founding engineer

- Led web/mobile development from founder vision to MVP, successfully onboarding 6+ high-potential artists and as well securing >\$500k seed-funding from investors.
- Built AI-assisted workflows and smart-versioning for the iterative process of music creation, increasing artist productivity by 70% through real-time qualitative insights for their current pipeline tracks/previous hits.
- Designed and led the team to produce a high-authenticity data engine pulling from 10+ streaming platforms and soundcharts. This helped artist managers using our marketing plan feature to make data-driven decisions.

ORACLE, Hyderabad, India 2018 – 2025

Software Architect, Core Framework team (2021 – 2025)

- Led the cloud-native migration of enterprise batch microservices to OCI Kubernetes (OKE) by implementing cloud native features, reducing client operational costs by 30% and increasing batch throughput by ~20%.
- Led cross-functional teams in global Pitch IT & Ship IT competitions, showcasing customer centric innovations and eventually influencing roadmap adoption into our core product and across 5+ dependent edge-products.
- Developed a secure data export solution from Oracle DB to OCI storage using parallel writes and file-splitting design mechanisms, reducing export time by ~25% and accelerating adoption of OCI customer analytics features.
- Improved the customer dashboards by simplifying the UX design of their main workflows to save ~\$800k in annual support costs, implemented intelligent default configurations at server level and also revamped outdated summary charts with new interactive designs.
- Revamped developer onboarding programs across two years by improving course content with OCI and cloud features, reducing ramp-up time and saving ~960+ engineering hours.

Associate Software Engineer (2020 – 2021)

- Delivered cost-reduction features that cut Oracle consulting teams implementation effort by ~33% to help them move redundant/static business code across different application stages DEV/TEST/RC/PROD efficiently, saving ~\$100K/project costs and enabling faster go-lives with their client projects.

Application Developer (2018 – 2020)

- Mitigated platform risk exposure estimated at \$1M+ annually by collaborating with security leads to identify and patch high-priority CVSS vulnerabilities. Rolled and patched critical security upgrades across multiple quarters reducing product vulnerability issues by 80% and ensuring software compliance with cybersecurity standards.
- Optimized application builds times from 6+ hours to ~4 hours, saving ~1200 hours/year for dev/release engineering and faster product version deliveries to on-prem customers by ~1.5x.

SKILLS AND ACTIVITIES

- **Certifications:** OCI Cloud Architect certified, Oracle AI Certified, Agentic development (Cursor, Google AI developer studio, OpenClaw), Hugging face 3rd party AI models, Java, Nodejs, SQL, Python
- **Interests:** Finance, Fitness, Hackathons, Math Enthusiast (State 9th rank in Math Olympiads, IIT-JEE 10k ranker)
- **Awards:** Employee recognition (FY22, FY24) & "Model the Mission" (FY23) team awards for product innovations.
